

## Product information | TECHNICAL DATA SHEET

### MTN BOX.

1721g, 400 x 300 x 265 mm.

#### GENERAL DESCRIPTION

The MTN BOX is a stackable plastic box designed and manufactured exclusively to transport spray cans and store them neatly anywhere, from your home or workshop to the trunk of your car. Made in the European Union, its solid recycled plastic structure is especially designed to withstand the weight of an average person, allowing the artist standing on the MTN Box to gain 40 cm in height.

The interior separations are precisely designed to be able to store all MTN aerosol sizes, and able to hold between 20 (Mega Colors) and 40 (Water Based 300) spray cans depending on their size. When filling the box with 400 ml cans, the remaining space is perfect for storing gloves, caps or other accessories.

#### CHARACTERISTICS

- Maximum Capacity: 20 750 ml spray cans.
- Compatible with all Montana Colors spray cans.
- Recycled black plastic made in the EU.
- Stackable.
- Resistant.
